Experience

TestMu AI (formerly LambdaTest) [🔗](#) Aug 2024 – Present
Member of Technical Staff – Open Source Engineer Noida · Onsite

- **Built observability for [rook](#)**, TestMu AI's CLI for testing AI agents: request-scoped logging from its Go services into Sumo Logic, routing only dashboard lines to the paid tier and dropping health-probe noise, which was half of all log volume
- **Built Sumo Logic and New Relic dashboards for stage and prod**: p95/p99 latency per route, release health per deploy and LLM cost per role; New Relic alerts routed to Slack caught credits-service failures, credit outages and 5xx errors
- **Kept Appium's iOS automation working** when Apple moved device services to the new RemoteXPC protocol: built 10 iOS device services, including DVT instruments, notification proxy and springboard, in [Appium iOS RemoteXPC](#) (1.3M+ monthly downloads) and shipped them in the [XCUITest driver](#) (4M+ monthly)
- **Appium org member**; implemented iOS 18+ **Web Inspector support** in the [Remote Debugger](#) to keep web view testing working, and fixed a hang on iOS 26
- **Secured official development partner status** for TestMu AI with [Selenium](#) [🔗](#) and [Appium](#) [🔗](#), the leading open-source web and mobile automation frameworks
- **Selenium committer** with 60+ merged PRs; **shipped 12 WebDriver BiDi features** in the Java bindings for cross-browser network, geolocation and timezone emulation, and helped shape Selenium 5's high-level BiDi API
- **Added 6 tools to Appium MCP**, which lets AI agents drive real mobile devices, including screen recording and app state, and consolidated its app and session tools
- **Built Terminal Studio for AppClaw**, a TUI that runs plain-English steps on a live device and exports them as runnable tests, plus iOS simulator streaming

The V Programming Language [🔗](#) Aug 2022 – Present
Core Developer Remote

- **340+ merged PRs** across the parser, type checker, scanner and C code generator of V, a compiled systems language
- **Hardened type safety with 91 compile-time checks** that reject unsafe or invalid code, such as const integer overflow, casts outside `unsafe` and misused option/result types
- **Designed language features**: operator overloading where users define only `==` and `<` and the compiler derives `!=`, `>`, `>=` and `<=`, extended to aliases and generics; plus `&&=` and `||=` operators and consts in match ranges
- **Improved developer tooling**: colored syntax highlighting and per-OS docs in `v doc` (10+ PRs), and packaged V for [nixpkgs](#)

Education

KCC Institute of Technology 2022 – 2026
B.Tech in Computer Science *Graduated*

Projects

Box CLI Maker [🔗](#) 2020 – Present

- **Go library for rendering highly customizable terminal boxes**, used by Kubernetes' [minikube](#); featured in [GitHub Release Radar](#) and [Awesome Go](#)

Open Source [🔗](#) 660+ PRs · 80+ repos

- **Charm**: ENV and copy/paste commands in [VHS](#); [WithInput](#) and [WithTimeout](#) in [Huh](#)
- **10+ PRs to WebdriverIO** and 20+ to the [Selenium website](#), plus a GitHub CLI fix

Monkey Interpreter in V [🔗](#)

- **Tree-walking interpreter** with closures, hashes and a macro system, following *Writing an Interpreter in Go*

Modern C++ Series [🔗](#)

- **Ongoing 9-part series since 2019**, 2 parts published on [Built In](#): `constexpr`, `lambdas`, `std::optional` and variadic templates, each with runnable code

Technical Skills

Languages: TypeScript, Java, Python, Go, Rust, C++

Build & CI: [Bazel](#), [Make](#), [GitHub Actions](#)

Observability: [OpenTelemetry](#), [Sumo Logic](#), [New Relic](#)

Tools: [Node.js](#), [Deno](#), [React \(Ink\)](#)

Volunteering / Achievements

- **TODO Group OSPO Ambassador**, [the first in India](#) [🔗](#); Co-chair, OSS in Business WG
- **Program Committee**, Open Source Summit Japan 2026 [🔗](#) and 2025 [🔗](#); CFP Reviewer, GopherCon USA
- **Speaker**: [OpenUK panel](#) [🔗](#) and [GitHub Open Source Friday](#) [🔗](#)
- **Featured** among top global maintainers by the [Open Source Initiative](#) [🔗](#)
- **Contributor** to the [OSPO Book](#) [🔗](#) and the [KubeCon India 2024 OSPOlogy BoF report](#) [🔗](#); [Hacktoberfest](#) moderator
