Experience

LambdaTest

Software Engineer (OSPO) Intern

Aug 2024 – Present

Noida, Uttar Pradesh · Hybrid

- Strengthened Selenium's ecosystem by contributing **BiDi protocol** support and performance improvements
- Served as a **committer** to Selenium, facilitating LambdaTest's recognition as an official **development partner** 
- Implemented services in **Appium iOS RemoteXPC** to enable iOS device communication
- Contributed code to **WebDriverIO** and updated documentation for **Microsoft Edge Developer** to reflect the newly made changes
- Collaborated on Selenium 5's upcoming **high-level BiDi syntax**, influencing API design decisions across automation frameworks
- Moderated the global **Hacktoberfest** event, mentoring new contributors and facilitating high-quality open-source pull requests
- Expanded technical proficiency in **developer tool building**, **TypeScript/Python/Java development**, and **open-source governance**
- Represented LambdaTest at international conferences including **KubeCon India 2024 - OSPOLogy BoF**, where I authored the official session **report**  and participated as a **panelist** in **OpenUK - Openness and Access for All** 

The V Programming Language

Core Developer

Aug 2022 – Present

Remote

- Contribute as a **core developer** to V, a compiled, statically typed programming language
- Resolved issues in the compiler's **checker**, **parser**, **scanner**, and **code generation** modules to improve stability
- Implemented key features such as **operator overloading**, **match branch range expressions**, and **non-string map keys**
- Authored and maintained documentation and internal libraries to enhance developer experience and ecosystem reliability

Effective·AF

Software Engineer Intern

Aug 2023 – Oct 2023

California, United States · Remote

- Developed new features for the desktop client using the **Gio** GUI framework in Go, improving interface responsiveness and usability
- Refactored and optimized the existing **CLI codebase**, improving maintainability and reducing user friction
- Implemented comprehensive **error handling** and validation logic, improving system reliability
- Built modular **Svelte** components, including a chat navigation panel, to streamline user workflows within the web interface

Projects

Box CLI Maker

- Engineered a **Go library** for customizable terminal boxes with ANSI color and text formatting.
- Adopted by **Kubernetes'** **minikube** and multiple OSS tools
- Recognized with **500+ GitHub stars** and featured in *GoLang Weekly*, *GitHub Release Radar*, and *Awesome Go*

Go Systems and Backend Projects (Collection)

- Developed backend and systems projects — including a **mini Redis clone**, **Unix shell**, and backend apps inspired by the "*Let's Go*" book
- Explored **network programming**, **goroutines**, **channel concurrency**, and **low-level I/O**

Modern C++ Series

- Authoring an educational article series exploring advanced **Modern C++** concepts, including lambdas, optionals, raw strings
- Aiming to help developers transition from legacy C++ to modern standards with improved readability and performance practices

Technical Skills

Languages: Python, Go, C, C++, V, JavaScript, TypeScript, Java

Tools: VS Code, JetBrains IDEs, Git, Vercel, Bash, Hex Editor, Makefile, Bazel

Frameworks: Linux, Svelte, Node, Deno, SQL, gRPC

Volunteering / Achievements

- Featured by Open Source Initiative**  — highlighted among top global maintainers
- CFP Reviewer** for **GopherCon USA** and **Open Source Summit Japan 2025** 
- Maintainer and Community WG Lead** for OSS in Business at **TODO Group**
- Contributor to the OSPO Book**  — collaborated on the content of the enterprise OSS adoption
- Featured guest on GitHub Open Source Friday** 

Education

KCC Institute of Technology 2022 – 2026

Bachelor of Technology in Computer Science
